PCT/EP2004/003348

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The expression "wherein the mixture has a GFV of 200 to 600 g/mol double bonding **or** method according to claim 12" leaves the reader uncertain as to the meaning of the technical feature in question. Consequently, the subject matter of these claims is not clearly defined (PCT Article 6).
